DEVELOPER JAVASCRIPT ES6+ REACT & REDUX

PROFILE

Passionate developer, strong adept of the Agile/Scrum methodology, involved in all stages of the development from start to deployment. Comfortable working within a feature team or autonomously. Result and quality driven, I maintain a personal GitHub to evaluate the latest trends by building various end-to-end projects. I'm also very passionate about mobile apps development.

EDUCATION

2021 - 2023 MSc. Web and Mobile Application Development

Northumbria University, London, United Kingdom

WORK EXPERIENCES

React Developer, NatWest Bank, London, July 2021 – August 2023

Rebuilding the existing Financials and Dashboard applications with new features and migration from the current system to a new API driven architecture.

- Building new features using ReactJS v17 functional components and hooks.
- Bug fix ensuring that the application and features are fully functional.
- Building reusable components across applications.
- Versioning using Git & GitHub/Bitbuckets

Technical Environment:

React v17+ (Hooks), Redux/Redux Saga, JS ES6+, HTML, CSS, SASS, Styled Component, React-Table, React-Chart-JS, Tree-Map, Material-UI, REST API.

React Developer, RiskCare Financials, London, October 2020 – June 2021

Implementation of a CRM back-office application to manage client's portfolio with contacts, messages, meeting requests, communication history and documentation submission via API (REST).

- Feature based development using ReactJS v16+ (Hooks), Redux & Redux Saga
- Multilingual support using the React i18n react-localization library.
- Building reusable components & new features using GIT/GitHub versioning.
- Getting feedback from end users and developing solution as per change request.

Technical Environment:

React v16+ (Hooks), Redux/Redux Saga, JS ES6+, HTML, CSS, SASS, Styled Component, REST API.
